

Opening a database through Access

• Locate the folder where the database is saved. (If you are not sure the location can be found through the Actiheart Software).

- Once you have found your database through Windows, simply double click on the database file (XXXX.mdb)
- When the following screen appears, click 'open':

• The following screen will appear:

	Microsoft Access		_(0)
	Elle Edit Hew Josert Iosis Window H	lo	Type a question for help
Check table is selected	1912.0.9	Tribus and a set of a	

 The ReadInfo and UserInfo tables are the tables that will be referred to in certain sections of this document.
